## Introduction to Rent a Signal

A FX Signals Marketplace where you will be able to mirror the Worldwide FX Traders, trade for trade.

*Thanks for choosing Rentasignal Autotrading. As you will read on the following pages, trading with Rentasignal is just a few clicks away.*

To save time and make your trading life easier, Rentasignal developed Autotrading, as one of the most advanced methods where buy and sell orders are placed automatically into your account. Just setup your risk settings, select the best signals for you and forget to spend several hours in the front of your computer waiting. All trades will be executed automatically. Any buy or sell orders are sent out to be executed in our platform without the need to install any software on your side. Your only needs are Internet connection, fully capable browser, and one account with one of the brokers that works in conjunction with Rentasignal.

Autotrading is FREE, Rent a Signal and the Brokers are compensated for their services through the BID/ASK spread.

 Valuable information

## Autotrading Feature

 Take note about

 Computer tip

 Workbook review

With autotrading your only needs are one real account with a compatible broker with Rentasignal and to subscribe to one or more signals offered on our website. However, you will be able also to trade manually. Rentasignal will let you set your preferred risk settings for your general account, but also for each subscribed signal. You will be able to filter currencies pairs to trade, override signal's stop loss and/or take profit, limit your trading accordingly to server criterions and lots of other possibilities that allow you to select and adjust the most convenient signals accordingly to your risk profile.

### Time to start

Rentasignal needs you to create an account first. There are three different types of account according with your needs. Autotrading and Renting accounts were designed for traders looking to minimize the effort of trading. A Signal Provider account is for those who desire to offer his trading through a Rent a Signal's signal to other traders. If you want to Autotrade or offer your signal, you need to click on New Account, then to the right type of account.

You can have several accounts if needed, for autotrading and also offer your own trading strategies through a signal.

If you want to Autotrade and provide your signals to others, you will need to have two accounts, an Autotrading and a Signal Provider account.

## New account

**Upgrade** from Renting to Autotrading account is possible.

Opening your Autotrading account is really easy. Just click on **New Account**. Then click on OPEN AUTOTRADING ACCOUNT and just follow the steps as indicated.

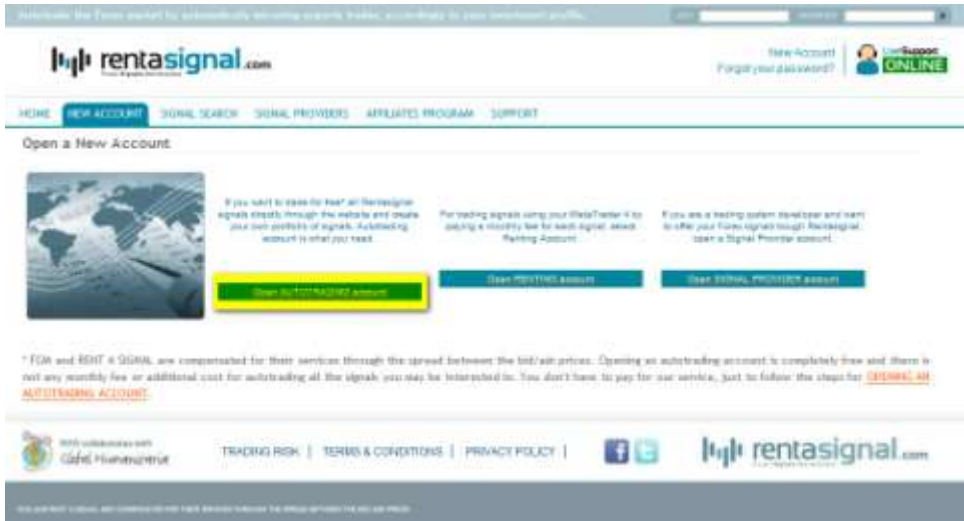

FIGURE 1.1 There are three types of accounts. If you are a client, you can choose between Autotrading or Renting account. If you are going to provide your trading through a signal, you have to choose Signal Provider account.

FIGURE 1.2 First step of your autotrading account opening.

If you already have a Renting account, you can upgrade to an Autotrading account by clicking on **My account** and going to **Profile**. You will find **UPGRADE TO AUTOTRADING ACCOUNT** within **TYPE OF ACCOUNT** field.

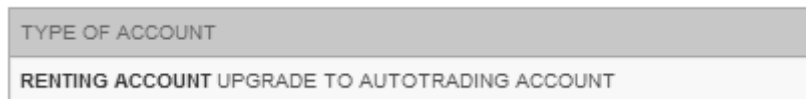

FIGURE 1.3 Click for upgrading your RENTING to AUTOTRADING account

## Broker Selection

Rentasilgnal Autotrading requires a compatible broker. You can select the best broker of your choice from the list to open a MT4 trading account. It is necessary to open a new MT4 account besides you may already have one.

FIGURE 1.4 Select a broker by clicking on its logo.

## Introduce your personal Information

A new window will be shown after clicking over the logo. Carefully complete all the required data, navigate to page bottom, and click on **CREATE NEW ACCOUNT**.

Be careful when choosing your Country, because contract and conditions are specific for each one due to regulations. If you fail or make a mistake when selecting your country, it may be possible that you had to open a new autotrading account.

Subscribe the form below by submitting all necessary account details, including account agreement profile.

Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

FIGURE 1.5 Introduce your personal information that must be the same information to be used by opening the account with the broker.

You will receive an e-mail from Rentasignal in order to confirm your new account. The e-mail contains a one-time link to click. Once you have clicked the link, you will be forwarded to your new account for the first time and you will have the possibility to change your password.

## Broker Account Opening

Now, you will have to open your broker account for being connected to your Autotrading account.

Just follow the instructions provided on step 4<sup>th</sup> accordingly to your country of residence. It is possible that you will have to fill one or some online forms and maybe sign and send by e-mail some documents. It is fully explained how you have to proceed, but please, don't forget any of the steps as indicated.

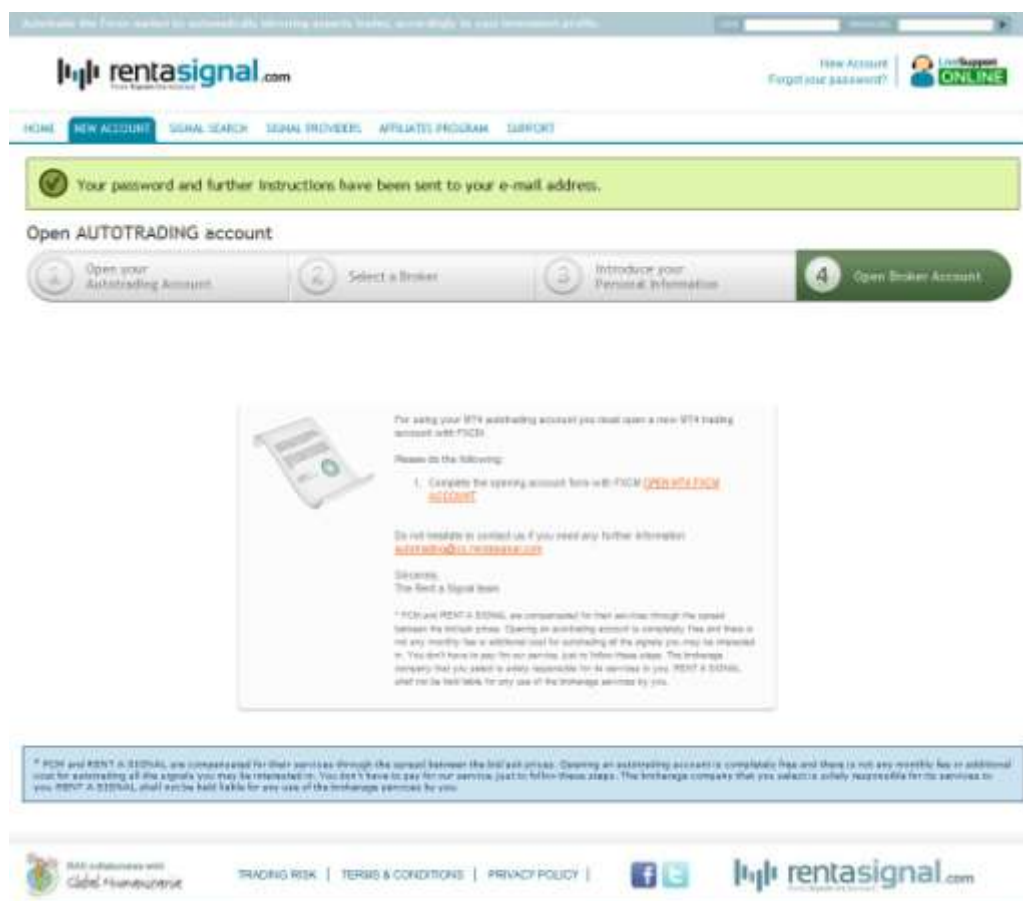

FIGURE 1.6 Open an account with the broker is the last step. The information you will see here is related with your country.

It can take to the Broker some hours/days to open your MT4 account. Once your broker confirms to you your MT4 trading account, Rent a Signal will automatically activate your Autotrading account for being connected to your broker trading account.

## First Time Log In

Meanwhile your broker is processing your request, you should check your e-mail and confirm your new account. Click on the link received to use your **one-time only login**. After clicking, you will be forwarded to your account.

**RENTASIGNAL AUTOTRADING**

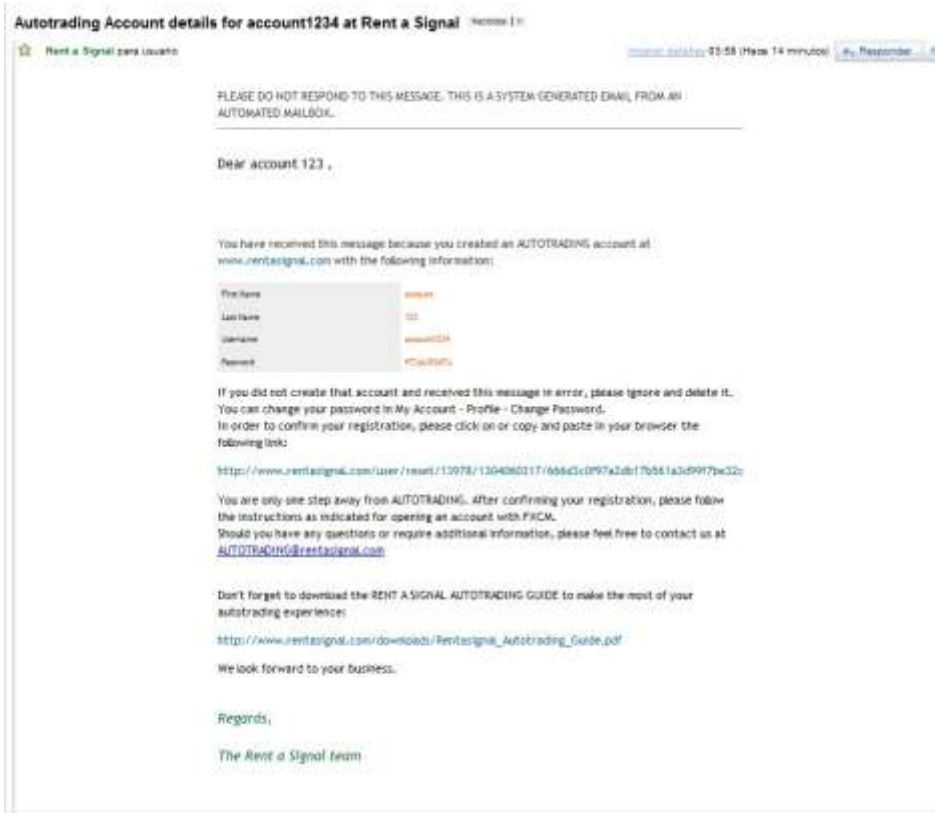

FIGURE 1.7 Sample of the e-mail that you will receive for confirming your autotrading account with Rent a Signal.

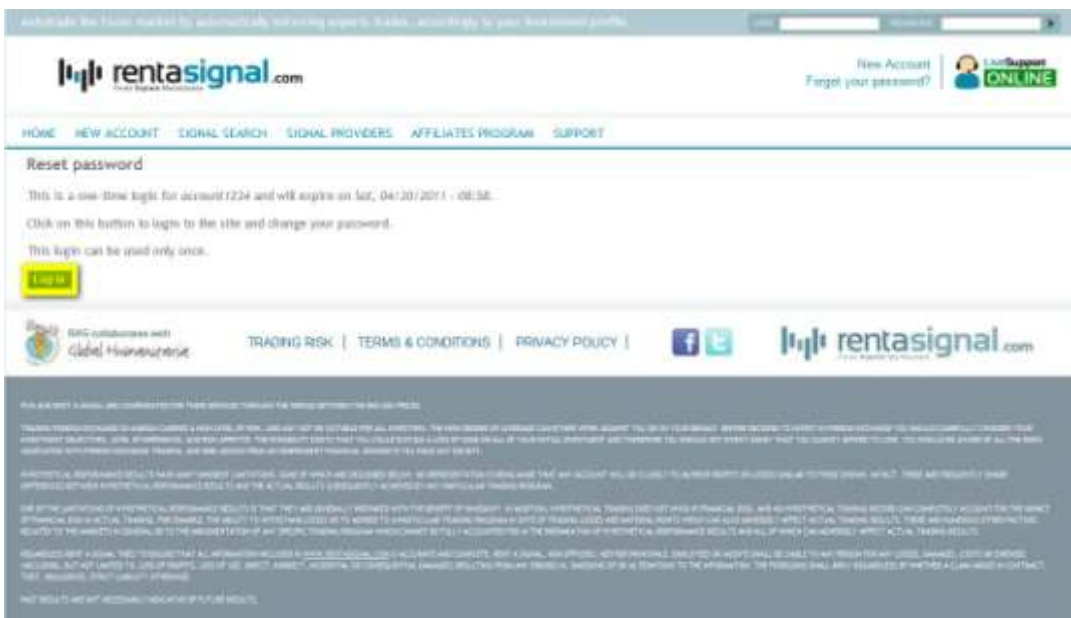

FIGURE 1.8 One-time login, then you will be able to change your password.

When log into your Autotrading account for the first time, you have to change your password. Once you have successfully changed the password, logout and login again.

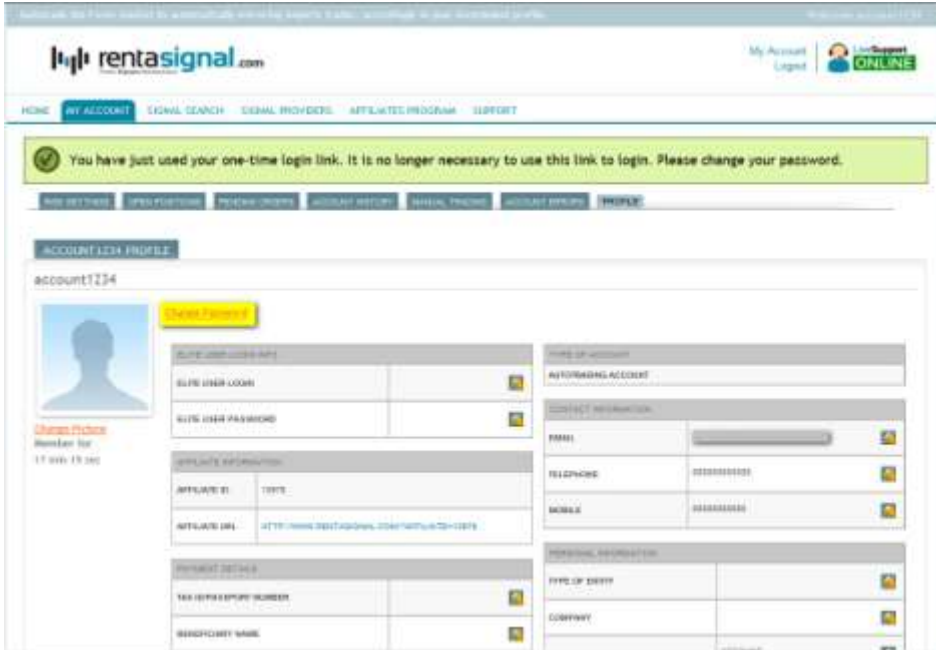

FIGURE 1.8 Click on Change Password for introducing your definitive password.

Your Autotrading account is ready for being connected to your trading account with the broker. Note that your Autotrading account is the account you have with Rentasignal. Your trading account is related with your broker. When this manual refers to an “Autotrading” account, it is referring to your account with Rentasignal. When referring to your “Trading” account, it is your account with your Broker

Both accounts have to be connected for autotrading with Rentasignal your broker trading account.

## Autotrading account status

Once you have received your notification from your broker that your account has been approved and it is ready for trading, we receive the same communication and activate your autotrading account. You are permanently informed by e-mail from the broker and Rentasignal about any change in the status of your account.

Your autotrading account goes through the following states:

1. **Inactivated** -. You have followed the 4<sup>th</sup> steps indicated on Rentasignal website for opening an autotrading account.
2. **Activated** -. You have completed your broker trading account opening and your trading account is opened and funded.
3. **Connected** -. You have introduced your MT4 login details in your activated autotrading account with Rentasignal.
4. **Enabled** -. Your account is connected and ready for trading.

When your Autotrading account is not connected with your Broker, you will notice a warning message on top. Otherwise if your account is connected, but disabled, you will also be alerted.

## Connect your Autotrading account

For connecting your Autotrading account after opening and funding your trading account, you have to do as follows:

1. Login on Rentasignal and click **My Account – Risk Settings**.
2. Introduce your MT4 login and password on the left area of the bottom of Risk Settings and click on **CONNECT**.

If you need to stop trading for some time, you can disable your Autotrading account. This means Rentasignal will not process any new incoming trades, but it will keep processing any open positions or pending orders

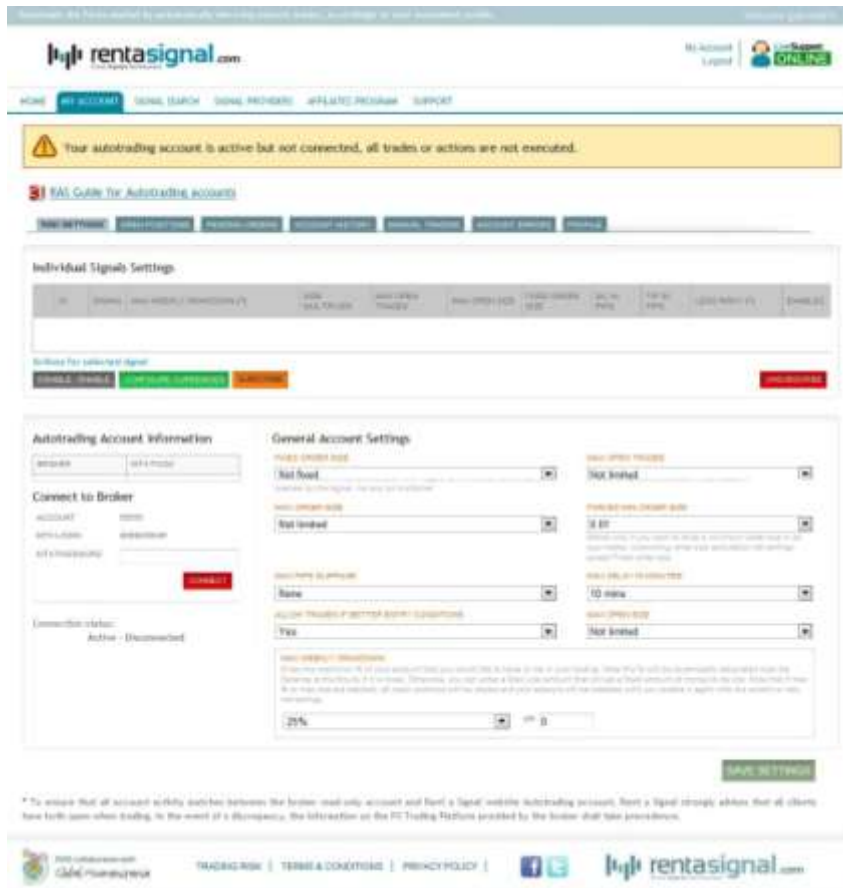

FIGURE 1.9 this screen is where you need to introduce your trading account data in order to connect Rentasignal with your Broker

## RENTASIGNAL AUTOTRADING

To summarize your account status and desired results, keep in mind that:

**Disconnected:** Your Autotrading account is disconnected from your broker. Rentasignal will not execute any kind of trades on your trading account.

**Connected:** Your Autotrading account is connected with your broker.

**Enabled:** Rentasignal will execute all kind of trades.

**Disabled:** Rentasignal will only execute pending orders or modifications of open positions.

## Risk Settings

*You will set your risk settings for adjusting your trading to your risk profile.*

## Managing Risk Settings per Account

**Account Settings** are related to your account and overrides any individual signal settings.

What you select here will have a direct impact on the trades of the subscribed signals in your trading account.

**General Account Settings**

**FIXED ORDER SIZE**  
Not fixed  
Select only if you want to use a fixed order size in all your trades. Note that it will not be taken into consideration with regard to the number of lot size units opened by the signal, nor any lot multiplier.

**MAX ORDER SIZE**  
Not limited

**MAX PIPS SLIPPAGE**  
None

**ALLOW TRADES IF BETTER ENTRY CONDITIONS**  
Yes

**MAX WEEKLY DRAWDOWN**  
Enter the maximum % of your account that you would like to have in risk in your trading. Note this % will be dynamically calculated over the Balance or the Equity if it is lower. Otherwise, you can enter a Max Loss amount that will set a fixed amount of money to be lost. Note that if max % or max loss are reached, all open positions will be closed and your account will be disabled until you enable it again with the current or new risk settings.  
Not limited OR 0

**MAX OPEN TRADES**  
Not limited  
Enter the maximum number of simultaneously open positions and pending orders allowed in your account.

**FORCED MIN ORDER SIZE**  
Not forced  
Select only if you want to force a minimum order size in all your trades, overwriting other size calculation risk settings except Fixed order size.

**MAX DELAY IN MINUTES**  
10 mins

**MAX OPEN SIZE**  
Not limited

**SAVE SETTINGS**

FIGURE 2.1 General account settings

**Fixed Order Size:** Fix the order size for all your trades, even your signal provider is trading with different sizes.

**MAX Order Size:** Set a maximum order size for all your trades. It will prevent you to trade with a higher size than your desired limit.

**MAX Pips Slippage:** Set your desirable value for slippage. It will prevent you to enter on a trade if your current quote is different from signal quote.

**Allow Trades if Better Entry Conditions:** Rentasignal will calculate mathematically if your current quote is best than signal quote and proceed with the trade bypassing other settings.

**Max Open Trades:** Set the maximum number of simultaneously open trades.

If you want to allow 10 trades as the limit, just set this value to 10. If your signal provider to keep sending orders, Rentasignal will ignore any new orders until the current open orders value is below the restriction level.

**Forced Min Order Size:** Select only if you want to force a minimum order size in all your trades, overwriting other size calculation risk settings except Fixed order size.

**MAX Order Size:** Set a maximum order size for all your trades. It will prevent you to trade with a higher size than your desired limit.

**MAX Delay in Minutes:** Set maximum expiration in time value for orders none executed. Orders old than selected value will be ignored

**Max Weekly Drawdown:** Enter the maximum % of your account that you would like to have in risk per week. Note this % will be dynamically calculated over the Balance or the Equity if it is lower. Otherwise, you can enter a Max amount that will set a fixed amount of money to be lost per week. Note that if max % or max drawdown is reached, all open positions will be closed and your account will be disabled until you enable it again with the current or new risk settings.

## Managing Risk Settings per signal

**Individual  
Signal Risk  
Settings** to  
control each signal  
with different  
criteria.

**Y**ou can also adjust your risk per individual signal, being possible to define different behaviors for each of them. These settings are independent from General Account Risk Settings and are overridden by them.

You need to be subscribed to at least one signal to see risk settings per signal under your Risk Settings Tab.

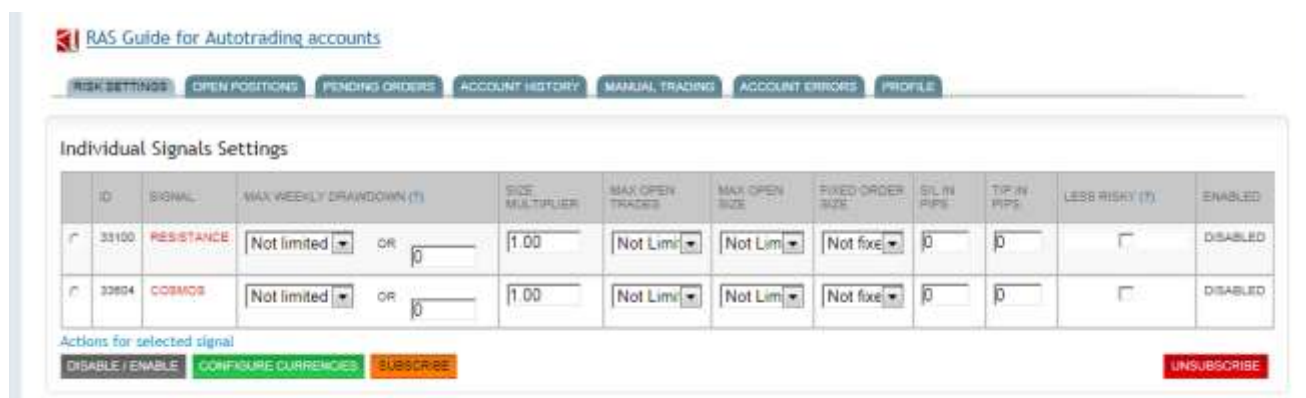

FIGURE 2.2 Individual Risk Settings available for each subscribed signal

**Max Weekly Drawdown:** This value is calculated as Max Weekly Drawdown per your overall account. But will affect only the related signal.

**Size Multiplier:** This is one of the most important settings, because the size of your trades will be calculated based just on Size Multiplier. Rentasignal will multiply the signal’s size orders with Size Multiplier value and your orders will be opened with the resulting size.

**Max Open trades:** Set the maximum number of simultaneously open trades per signal.

**Max Open Size:** Use this field for limiting the maximum open size for all your open trades.

**Fixed Order Size:** Fix the order size for all your trades within the related signal, even your signal provider is trading with different sizes.

**S/L in pips:** You will be able to introduce your own Stop Loss overriding signal’s provider value, if applicable.

**T/P in pips:** You will be able to introduce your own Take Profit Loss overriding signal’s provider value, if applicable.

**Less risky:** If ticked, this setting applies to S/L in pips. By applying this setting, Rentasignal will apply your selected values for S/L in pips, overriding provider’s stop loss, but only if this value provides a lower risk than you signal’s provider risk.

**Unsubscribe button:** You can click on this button to cancel your subscription to the signal.

**Enable (Red)/Disable (Green) buttons:** You can click on this button to stop receiving trades for a particular signal.

**Configure Currencies:** You can click on this button to enable or disable currencies you want to trade with each signal.

Always click on **SAVE SETTINGS** after performing any changes.  
**REALLY IMPORTANT**

## Signal Subscriptions

*Rentasignal lets you choose from hundreds of signals from worldwide providers. Adding any of these signals to your Autotrading account is really easy.*

## How to subscribe signals

You can **SUBSCRIBE** to any signal by clicking on SUBSCRIBE on different locations:

- FIND A SIGNAL

In Find a Signal you have available a Signals search engine that will allow you to find signals accordingly to several searching criterions, such as signal's name, ID, provider's name, classifications, etc.

FIGURE 3.1 Search Engine for finding signals.

FOREX SIGNALS	WEEKS	TOTAL PIPS	TOTAL USD	LAST WEEK PIPS	LAST WEEK USD	RAS RATIO 4 WEEKS

FIGURE 3.2 **SUBSCRIBE** any signal just from the ranking accordingly to their Performance Ratio and Most Popular criterions.

## RENTASIGNAL AUTOTRADING

- From MY ACCOUNT – RISK SETTINGS

FIGURE 3.3 Also you can **SUBSCRIBE** from you're MY ACCOUNT - RISK SETTINGS tabs.

- From INDIVIDUAL STATS of each signal

FIGURE 3.4 **SUBSCRIBE** is also available from the individual stats web page of all signals.

## FX-Portfolio Wizard

FX-Portfolio Wizard was developed by Rentasignal to help you select signals and adjust their order sizes to your risk profile and account equity.

**RENTASIGNAL AUTOTRADING**

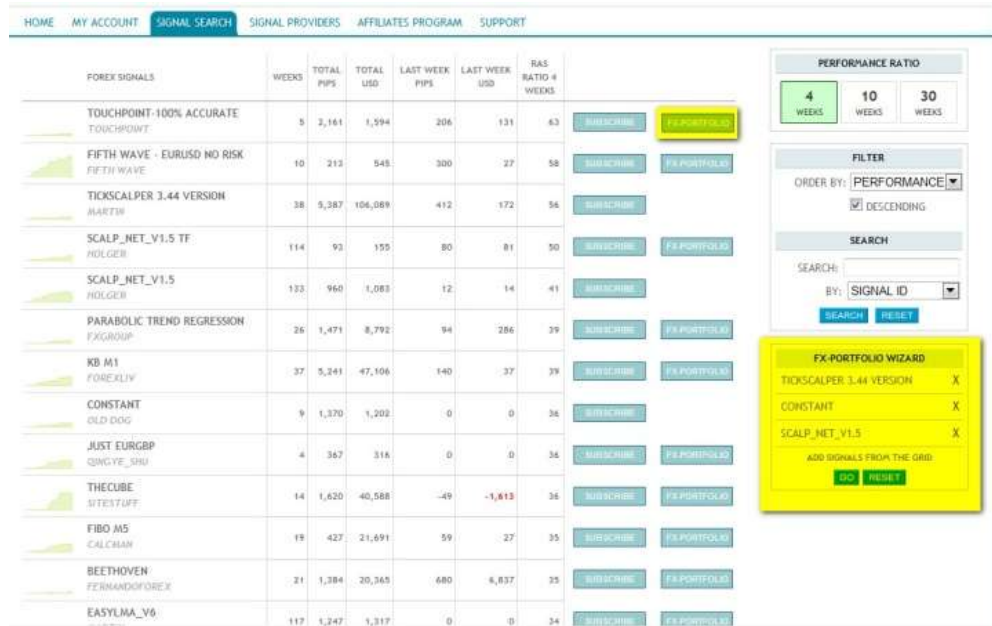

FIGURE 3.5 FX-PORTFOLIO WIZARD is a tool for selecting, comparing and adjusting signals.

From Find a Signal web page, you just need to select as many signals you may want to compare and adjust, then click on FX-Portfolio Wizard green button. You will get the most useful information to make your signals selection and decide what adjustments should be done accordingly to your risk profile.

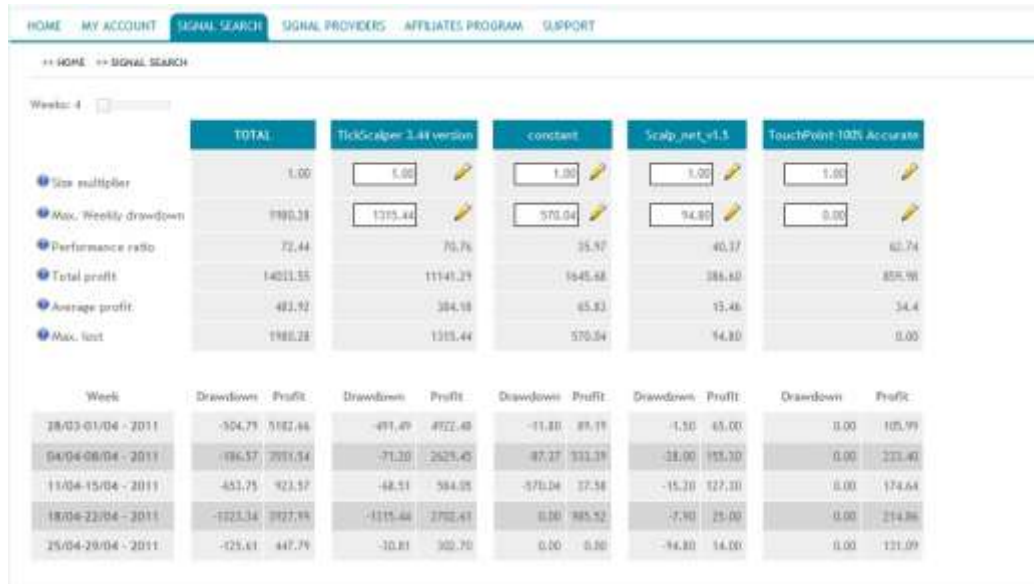

FIGURE 3.6 FX-PORTFOLIO WIZARD displaying a comparison between n three signals.

Try different values of SIZE MULTIPLIER, WEEKLY STOP LOSS and maybe CURRENCY PAIRTS and click on RECALCULATE for seeing how Max weekly drawdown and profit change their values. This is the best tool for adjusting the order sizes of the signals on your trading, accordingly to the size of your account and of course, your risk profile.

As a general rule of thumb, Total account Max Weekly Drawdown and Max Weekly Drawdown per signal should not be more than 30% and 10% respectively.

## My account

**My account** is your personal area within Rentasignal.

**M**y Account is your personal area where you will be able to handle from any issue regarding your profile and autotrading account.

Besides managing your Risk Settings, you can also check your open positions, balance, equity, execute manually your own orders, check your account history and modify your profile.

FIGURE 3.7 See full details of any trade within OPEN POSITIONS, PENDING ORDERS and ACCOUNT history tabs.

Within My account you will find six different tabs as follows:

**RISK SETTINGS:** set your own risk settings. See chapter two for more.

**OPEN POSITIONS:** check your current open trades and if you want, you also will be able to close any position or change its stop loss or take profit values.

**PENDING ORDERS:** check your current pending orders and modify their stop loss or take profit values, even close the order if you don't like it.

**ACCOUNT HISTORY:** find the history record of all our autotrading account. You can filter the information per signal, dates, etc.

**MANUAL TRADING:** you can execute your own manual trades.

**ACCOUNT ERRORS:** if something happens with your account, like an execution error, with be posted here.

**PROFILE:** modify your personal data and any other additional information about you.

## Size Multiplier

**Size Multiplier** is the key setup features to get your desired sizes of your trades.

The **SIZE MULTIPLIER** is the key setting for adjusting the signal's order sizes to your desired trading order sizes.

In order to make easier for you to adjust the size of your orders accordingly to the signals' size orders, you will only have to take into consideration the **SIZE MULTIPLIER** risk setting available in Individual Signals Settings.

· See some samples:

Signal Order Size	Your Size Multiplier	Your Order Size Results
0.01	10	0.10 (10,000 = 10k)
0.10	10	1.00 (100,000 = 100k)
0.10	0.5	0.05 (5,000 = 5k)
0.30	1	0.30 (30,000 = 30k)
1.00	0.01	0.01 (1,000 = 1k)

**RENTASIGNAL AUTOTRADING**

2.00	2	4.00 (400,000 = 400k)
------	---	-----------------------

According to above examples, for making easier for you to adjust the size of your orders accordingly to the signal's size orders, you will only have to take into consideration the SIZE MULTIPLIER risk setting available in Individual Signals Settings.

In addition, you will continue having the possibility to fix the size of your orders by using "Fixed Order Size" risk setting, and to limit the maximum or minimum size of your orders, by using "Max Order Size" and "Forced Min Order Size" risk settings respectively.

The screenshot displays the 'Individual Signals Settings' page on the RENTASIGNAL website. At the top, there is a navigation bar with 'MY ACCOUNT' highlighted. Below it, a sub-menu includes 'RISK SETTINGS', 'OPEN POSITIONS', 'PENDING ORDERS', 'ACCOUNT HISTORY', 'MARKET TRADING', 'ACCOUNT ERROR', and 'PROFILE'. The main content area is titled 'Individual Signals Settings' and contains a table with two rows of signal settings. The first row is for 'IB100' with 'RENTASIGNAL' and a 'MAX WEBSKY DRAWDOWN (%)' of 50%. The second row is for 'IB3004' with 'ECONOMICS' and a 'MAX WEBSKY DRAWDOWN (%)' of 15%. Both rows have a 'SIZE MULTIPLIER' of 0.00 and 'MAX OPEN TRADES' set to 'Not Limi...'. Below the table, there are buttons for 'DISABLE SIGNAL', 'CONFIGURE CONDITIONS', 'BUY SIGNAL', and 'UNSUBSCRIBE'. The bottom section, 'Autotrading Account Information', shows account details like 'BROKER: MT4FROM' and 'STATUS: ACTIVE'. It also includes a 'Connect to Broker' section with fields for 'ACCOUNT', 'MT4 LOGIN', and 'MT4 PASSWORD', along with 'DISABLE' and 'DISCONNECT' buttons. The 'General Account Settings' section contains various risk settings such as 'FIXED ORDER SIZE' (0.1), 'MAX ORDER SIZE' (Not limited), 'MAX OPEN TRADES' (Not limited), 'PERIODIC MAX ORDER SIZE' (Not forced), 'MAX PIPS SURFACE' (None), 'ALLOW TRADES IF BETTER ENTRY CONDITIONS' (Yes), 'MAX OPEN TRADES' (Not limited), and 'MAX WEBSKY DRAWDOWN' (Not limited). A 'SAVE SETTINGS' button is located at the bottom right.

FIGURE 3.8 Available Risk settings on MY ACCOUNT – RISK SETTING tab.

When selecting some features others will become disabled. You can note this when boxes becomes grayed

## Manual Trading

**Click over the symbols** for trading manually.

**R**entalsignal also gives you the chance to trade manually, by placing your own trades. On this tab, you will find the most common trading orders: market execution orders, pending orders, buy stop, sell stop, sell limit, and buy limit.

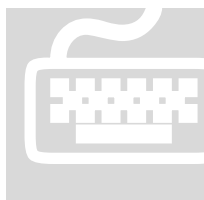

FIGURE 3.9 this picture shows symbols to trade. You can enable or disable symbols by clicking on show Filters

Click on “Show Filters” to display the symbols you want to see or hide the symbols you don’t want to see.

FIGURE 3.10 Symbols available for trading.

Once you have selected the symbol you want trade click on it, and a new window will be opened. Select the type of order you want to trade, Market Execution or Pending Order. Select all the necessary data and click buy or sell.

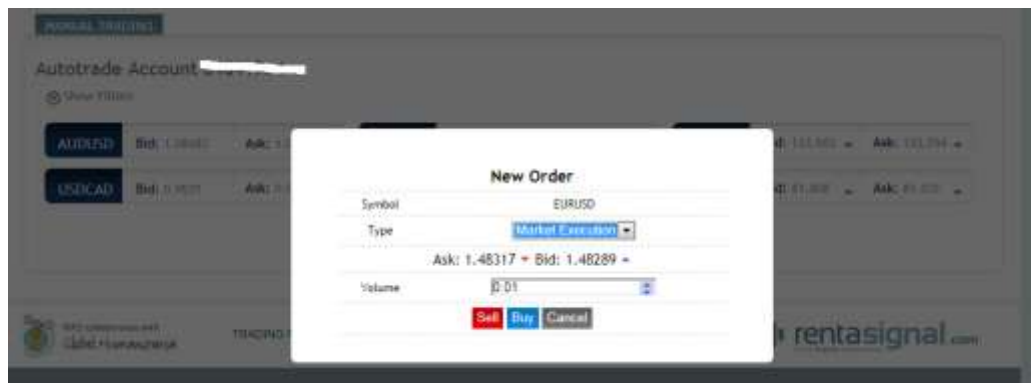

FIGURE 3.11 Market Execution order executed from manual trading tab.

To place stop loss and take profit for spot orders, you need to go to Open Positions tab after an order is placed and modify these values by clicking on them, then introducing new value.

**Pending Orders** will appear if you change the Market Execution to Pending Order on the drop-down selection.

Click on the arrows to change the prices. You can introduce here the S/L and T/P desired.

FIGURE 3.12 Pending orders executed from Manual Trading tab.
